DRINKING WATER WARNING

BOIL YOUR WATER BEFORE USING

HIERVAN EL AGUA ANTES DE USARLA.
ESTE INFORME CONTIENE INFORMACION MUY IMPORTANTE SOBRE SU AGUA DE BEBER.
TRADUZCALO O HABLE CON ALGUIEN QUE LO ENTIENDA BIEN.

You or someone using the drinking water in Mifflinburg Borough on Scottsdale Drive and 2nd St **May Be At Increased Risk From Microbial Contamination.**

We routinely monitor the conditions in the distribution system. On November 13, 2026, we experienced a loss of positive water pressure due to water being shut-off to make an emergency repair. A loss of positive water pressure is a signal of the existence of conditions that could allow contamination to enter the distribution system through back-flow by back-pressure or back-siphonage. As a result, there is an increased chance that the water may contain disease-causing organisms.

What should I do?

DO NOT DRINK THE WATER WITHOUT BOILING IT FIRST. Bring all water to a rolling boil, let it boil for one minute, and let it cool before using; or use bottled water. You should use boiled or bottled water for drinking, making ice, washing dishes, brushing teeth, and food preparation until further notice.

Inadequately treated water may contain disease-causing organisms. These organisms include bacteria, viruses, and parasites, which can cause symptoms such as nausea, cramps, diarrhea, and associated headaches.

These symptoms, however, are not caused only by organisms in drinking water, but also by other factors. If you experience any of these symptoms and they persist, you may want to seek medical advice.

Guardians of infants and young children and people at increased risk, such as pregnant women, some of the elderly, and people with severely compromised immune systems, should seek advice from their health care advisors about drinking this water. General guidelines on ways to lessen the risk of infection by microbes are available from EPA's Safe Drinking Water Hotline at 1 (800) 426-4791.

What happened? What is being done?

During installation of new communication lines in the area by a Windstream/Kinetic contractor, the contractor tore off a water service line to a residence. Therefore, the Borough had to make an emergency repair. In order to make the emergency repair safely, the Borough had to shut water off to customers in the area on Scottsdale Drive and 2nd St causing a loss of positive pressure. Therefore, a boil water advisory (BWA) is issued for the affected customers. Customers will be notified when the boil water advisory is lifted. We will be required to take water samples in order to lift the advisory.

We will inform you when all corrective actions have been completed and when you no longer need to boil your water.

For more information, please contact: Mifflinburg Borough Office
120 N 3rd Street
